

SmartCenter™ Information System

Unlimited number of incubation programmes

SmartCenter™ communicates with SmartDrive™, linked to each incubator via browser software, to give you fast, convenient, efficient access to any one incubator at any time. SmartCenter™ incorporates a powerful new programming module, with the options to use an unlimited number of incubation models (breed, age, storage specific).

Remote diagnostics

Should technical support for the operation, maintenance or trouble-shooting of your hatchery control system be needed, SmartCenter's™ internet-based system ensures that specialists from the Pas Reform Academy can be online and at your side anywhere in the world within moments.
